

# ASK YOUR DOCTOR about a low cost alternative to *Viagra*<sup>®</sup>.

*Sildenafil*, the active ingredient in *Viagra*<sup>®</sup>, is now available in a generic 20mg tablet. This practice offers *Sildenafil* 20mg tablets, which is significantly less expensive than *Viagra*<sup>®</sup>.

*Sildenafil* 25mg, 50mg or 100mg is sold under the name *Viagra*<sup>®</sup> and is used to treat erectile dysfunction (impotence) in men. *Sildenafil* 20mg is sold under the name *Revatio*<sup>®</sup>, which is used to treat pulmonary arterial hypertension and improve exercise capacity in men and women. Do not take *Sildenafil* while also taking *Revatio*<sup>®</sup> or *Viagra*<sup>®</sup>, unless your doctor tells you to. Your Doctor can prescribe the pulmonary hypertension dose of 20mg for off-label use to treat erectile dysfunction. Off-label means the drug has not been approved for the treatment of erectile dysfunction at that dose.

Prices are not negotiable and will not bill/file with your insurance. Unfortunately, we do not have the ability to bill pharmacy insurance plans. If you want to use your insurance, we will be happy to electronically send your prescription to the pharmacy of your choice.
